

Lifting Slings

Offering low weight, flexibility and ease of handling, Texspan slings will provide the ideal solution to most of your lifting problems. All slings are colour coded and additionally have ident stripes to indicate WLL, (Working Load Limit). Both duplex and round slings are manufactured to give a 7:1 safety factor, each sling is individually numbered for traceability and supplied with a certificate of conformity. Texspan slings fully comply with the requirements of BS EN 1492 : 2000, the UK & European lifting sling standard. All slings are CE marked.

Duplex Lifting Slings

Texspan duplex slings are manufactured in double thickness webbing produced from high tenacity polyester yarn. Terminated with a becket eye, reinforced to protect the eye against damage during lifting. They offer lightness and suppleness, removing the risk of damage to sling or load.

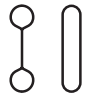

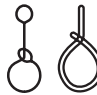

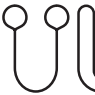

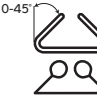

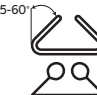

Round Lifting Slings

Texspan round slings are manufactured from 100% polyester. The sling is made-up with a seamless outer polyester cover and a core produced from a continuous hank of high tenacity polyester which is hugely strong. They are softer than duplex slings and kinder to delicate surfaces.

Guide to Safe Lifting

Correct sling selection is an important consideration when planning your lift. The WLL will change depending on the lifting mode used; straight lift; choke hitch or basket lift. Use the factor to determine the correct sling selection. A comprehensive guide covering – correct sling selection, storage, inspection, care and usage is available upon request.

					
mode factor	1	0.8	2.0	1.4	1.0
1 tonne	1,000kg	800kg	2,000kg	1,400kg	1,000kg
2 tonne	2,000kg	1,600kg	4,000kg	2,800kg	2,000kg
3 tonne	3,000kg	2,400kg	6,000kg	4,200kg	3,000kg
4 tonne	4,000kg	3,200kg	8,000kg	5,600kg	4,000kg
5 tonne	5,000kg	4,000kg	10,000kg	7,000kg	5,000kg

Quality Matters

We take pride in both the service we offer and our price promise that will always ensure you receive the keenest price available.
