

Textarp PE Tarpaulins

The Textarp polyethylene tarpaulin range has been specially developed to meet all your cover requirements. It comprises four quality grades in a mix of colours and sizes including the double colour, a two colour tarpaulin that is blue on one side and green on the reverse.

Textarp **CONTRACTORS** Polyethylene Tarps

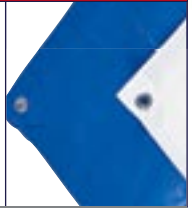

Ideal for most temporary cover work where cost is an important consideration and the extra strength afforded by Textarp Standard, Plus or ST™ qualities is not required. This is our most popular tarpaulin range offering exceptional value for money.

Construction: Woven polyethylene with 30 micron coating both sides. Weight 90gsm.

Textarp **STANDARD** Polyethylene Tarps

Traditional standard tarpaulin quality ideal for most temporary waterproof cover applications. Textarp standard offers a combination of economy, strength and durability whilst remaining light and manageable.

Construction: Denser weave construction with 30 micron waterproof coating each side. Weight 110gsm.

Textarp **PLUS** Polyethylene Tarps

Produced with a dense weave and extra heavy polyethylene coating both sides for super strength and durability. The tarpaulins are UV stabilised to inhibit material degradation and colour fade. Textarp Plus are recommended as market stall covers and other applications where superior tear or burst strength is required.

Construction: 14 x 14 weave with extra heavy 40 micron coating both sides. Weight 180gsm.

UV stabilised: Yes

Textarp **ST & STFR** Polyethylene Tarps

A high specification tarpaulin, the Textarp ST range offers superior strength and durability derived from over a 50% increase in weight compared to the Textarp Standard Plus. A translucent flame retardant option is available, recommended application include house refurbishment, welding screens, temporary partitioning.

Construction: 3 x 3 weave, 2400 denier. Weight 175gsm.

Flame retardant: Yes
